

AFBR-S4N66C013

NUV-HD Single Silicon Photo Multiplier

Description

The Broadcom® AFBR-S4N66C013 is a single silicon photo multiplier (SiPM) used for ultra-sensitive precision measurement of single photons. The active area is $6.0 \times 6.0 \text{ mm}^2$. High packing density of the single chips is achieved using through-silicon-via (TSV) technology and a chip sized package (CSP). Larger areas can be covered by tiling multiple AFBR-S4N66C013 CSPs almost without any edge losses. The protective layer is made by a glass highly transparent down to UV wavelengths, resulting in a broad response in the visible light spectrum with high sensitivity towards blue- and near-UV region of the light spectrum. The AFBR-S4N66C013 SiPM is best suited for the detection of low-level pulsed light sources, especially for detection of Cherenkov- or scintillation light from the most common organic (plastic) and inorganic scintillator materials (for example, LSO, LYSO, BGO, NaI, CsI, BaF, LaBr). This product is lead free and compliant with RoHS.

Pad Layout and Soldering Ball Geometry

Figure 2: Rear View and Cross Sections

A is for anode, C is for cathode. All cathode balls (C_1 to C_6) are connected together. All anodes (A_1 and A_2) are connected together. Unlabeled balls are floating, preferred electrical connection to cathode voltage.

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause damage to the devices. Limits apply to each parameter in isolation. Absolute maximum ratings are those values beyond which damage to the device may occur if these limits are exceeded for other than a short period of time.

Parameter	Symbol	Min.	Max.	Unit
Storage Temperature	T_{STG}	-40	+85	°C
Operating Temperature	T_A	-40	+85	°C
Soldering Temperature ^{a, b}	T_{SOLD}	—	245	°C
Lead Soldering Time ^{a, b}	t_{SOLD}	—	60	s
Electrostatic Discharge Voltage Capability HBM	ESD_{HBM}	—	2	kV
Electrostatic Discharge Voltage Capability CDM	ESD_{CDM}	—	500	V
Operating Over Voltage	V_{OV}	—	10	V

a. The AFBR-S4N66C013 is reflow-solderable according to solder diagram as shown in [Figure 3](#).
